

Instructions for Installing Jupyter Notebook via Anaconda

Dear Students,

To get started with Jupyter Notebook, please follow these steps:

1. Download and Install Anaconda:

- Go to this link <https://www.anaconda.com/download/success> and download the Anaconda distribution for your operating system (Windows/macOS).
- Follow the installation instructions provided on the website <https://docs.anaconda.com/anaconda/install/>

2. Launch Anaconda Navigator:

- After installation, open **Anaconda Navigator**.
- From the dashboard, click **Launch** under the **Jupyter Notebook** tile.

3. Access Jupyter Notebook:

- Once launched, Jupyter Notebook will open in your web browser, and you'll be able to start working on your notebooks right away.
-

For additional help, here are two short video tutorials:
